

REMARKS

In view of the fact that the presence of non-elected claims and minor informalities are all that stand in the way of allowance of this application, the non-elected claims 21-37 have been canceled and made the subject of a divisional application. Furthermore, all of the improper antecedents have been corrected and the last two sections amended to converted several terms into standard means plus function language in accordance with the sixth paragraph of 35 USC § 112 thus complying with the Examiner request for clarification.

As a result, it is submitted that all areas of indefiniteness have been corrected so that the rejection under 35 USC § 112 should be withdrawn and such action is requested. There having been no prior art rejections made and given the Examiner's comments concerning patentable subject matter, this application should now be in condition for allowance.

While the present application is now believed to be in condition for allowance, should the Examiner find some issue to remain unresolved, or should any new issues arise, which could be eliminated through discussions with applicant's representative, then the Examiner is invited to contact the undersigned by telephone in order that the further prosecution of this application can thereby be expedited.

Respectfully submitted,

By:
